

## Ball Screws - HTF-Series

The HTF-Series of High-Speed, High-Load Ball Screws offers several types: The HTF-SRC Series for high speed and high loads. The HTF-SRD Series with large leads for even higher speeds. The HTF-SRE Series of large Ball Screws for spindle diameters of 140 mm or more. The HTF-SRM Series for heavy duty and high temperatures.

### Product Features

- Super high-load capacity
- High speed
- Low noise
- Compact design
- Options: - S-HTF-series with tough steel material - A1-series with optimised sealing performance - Long life technology

### Benefits

- Maximum allowable dynamic load
- Maximum life due to a proper load distribution

### Condition Description

- High Accuracy
- High Load
- High Speed

### Industries

- Injection Moulding
